

Agent Setup Experts — Google Ads API Tool Design Document

Company: Agent Setup Experts

Website: <https://agentsetupexperts.com>

Contact: christian@agentsetupexperts.com

Date: May 17, 2026

1. TOOL OVERVIEW

Agent Setup Experts uses the Google Ads API exclusively to manage its own advertising account programmatically. The tool is an internal automation system that creates, updates, and monitors Search campaigns for our own business — not a product offered to clients or the general public.

2. PURPOSE AND USE CASE

We use the Google Ads API to:

- Create and manage Search campaigns targeting small business owners in Miami, Florida
- Add and update keyword lists (exact and phrase match)
- Create Responsive Search Ads for each campaign
- Monitor campaign performance and adjust budgets
- Track conversion actions (booked strategy calls via Calendly)

3. TOOL ARCHITECTURE

- Platform: Python script running on our internal server (Mac Mini, macOS)
- Authentication: OAuth 2.0 with offline refresh token
- API Version: Google Ads API v19
- Access scope: Read/write access to our own Google Ads account only
- No external users, no client accounts managed through this tool

4. CAMPAIGN STRUCTURE

Campaign 1: ASE | Law Firm | Miami

- Type: Search
- Budget: \$10/day
- Geo: Miami-Dade County (Presence only)
- Keywords: Long-tail exact + phrase match targeting law firms seeking AI automation
- Landing page: <https://agentsetupexperts.com/miami-law-firm-ai>

Campaign 2: ASE | Med Spa | Miami

- Type: Search
- Budget: \$6.50/day
- Geo: Miami-Dade County (Presence only)
- Keywords: Long-tail exact + phrase match targeting med spas seeking AI automation
- Landing page: <https://agentsetupexperts.com/miami-medspa-ai>

5. DATA FLOW

User query triggers Google Ad

- Click lands on vertical-specific landing page
- User books free strategy call via Calendly
- Conversion tracked via Google Ads conversion action
- API reads conversion data to optimize bids and keywords

6. ACCESS CONTROLS

- API token stored securely in encrypted credentials file on internal server

- Access limited to internal engineering team (1 person)
- No third-party access, no client data processed through this tool
- No reselling or white-labeling of API access

7. COMPLIANCE

- All campaigns comply with Google Ads advertising policies
- No automated bidding manipulation or policy circumvention
- API used solely for legitimate campaign management of our own account
- Developer token associated with MCC account 399-536-8568
